Work Experience

Software Developer (C#)
Foodintech aka Flow Tech / Leça da Palmeira – Matosinhos
December 2022 – Present
- Developing on a MES (Manufacturing Execution System) software.
- Working as Full Stack, using MVVM (Model View ViewModel) architecture design pattern with C# (.NET) and SQL Server in the Back End, and WPF (Windows Presentation Foundation) in the Front End.
- Created an integration between the software and the Telerik Report Designer, to import and export labels to help the users design their labels and import to the backoffice program import the design and print customized labels.

NOC Technician (Network Operations Center)
DSTelecom / Palmeira – Braga
January 2022 – December 2022
- Working and supervising on a FTTH (Fiber-to-the-Home) network spread across continental Portugal, inspecting incidents and reporting them, using various tools, some of them developed by the NOC Technicians.
- Maintaining and integrate a Grafana project to show real time metrics.

Full Stack developer and Videogame Developer with Augmented Reality
Digitalspecies / Soutelo – Vila Verde
Work-related training + IEFP Internship
March 2017 – September 2018 (1 year 7 months)
- Created a prototype backend and a dashboard (using Laravel) for an airport to know the influx of passengers in the commercial area using Situm REST API.
- Worked on several WordPress projects focused on E-Commerce.
- Developed a chatbot working with voice inputs using api.ai (now known as DialogFlow from Google).
- Developed a frontend with JSHG (JavaScript Hand Gesture Plugin) and JSCV (JavaScript Computer Vision) that the users could navigate the website using hand gestures.
- Created an Android Videogame with augmented reality on Unity3D engine and Navisens plugin for indoor locations.
- Created and contributed on several E-Commerce B2B and B2C instances made using Laravel.

Network and IT technician
Mercado Cruzeiro / Ferreiros – Amares
IEFP Internship
April 2014 – May 2015 (1 year 2 months)
- Managed and maintained an enterprise network to connect several POS running an invoice software called Sage L50 (now known as Sage 50Cloud) and using a MS Access database and later migrated to a SQL Server database.
- Installed and configured a CCTV system on the enterprise.

Intern – Computer technician (IT)
Cybergaming / Ferreiros – Amares
Technician of management, maintenance and repair of computer equipment
Work-related training
January 2012 – June 2012 (6 months)
- Repaired computers and electronic components.
- Worked and managed a Lan House environment with the software Handy-Café.

Academic Formation

Computer Science and engineering (Bachelor's Degree)
Instituto Politécnico de Viana do Castelo / Viana do Castelo
(2017 - Present)
